Developed by employing **180 billion variables** and was trained on **3.5 trillion codes**.

according to QuantumBlack AI by McKinsey.

Quotes

“Proactive governments are best positioned to lead advancements in the field of artificial intelligence and its applications in the future”.

HE Omar Al Olama
*Minister of State for Artificial Intelligence,
Digital Economy and Remote Work Applications*

“Technology today is really at an inflection point; we are at the point of the next wave of computing”.

Ali Dalloul
Vice President, Azure AI, Microsoft

"AI holds the key to addressing challenges such as climate change and sustainability. It is an exciting time, and technology is our ally in overcoming these hurdles".

Stephen Anderson
Partner, PwC

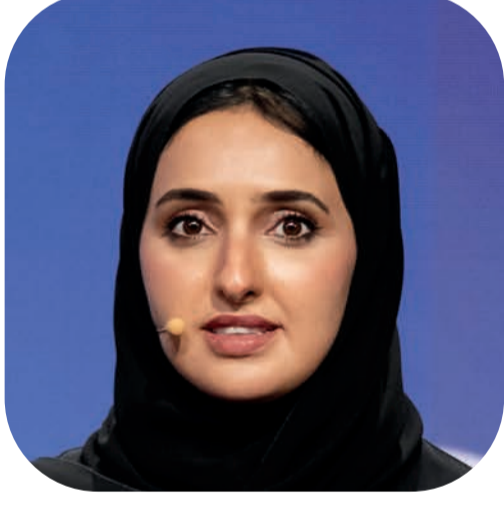

“The way we work with AI will never be the same, and the greatest impact will be felt in industry domains such as nuclear fusion, climate change, and drug discovery”.

Costi Perricos
Partner, Global Generative AI Leader, Deloitte

“There is an urgent need for governments to work together to set a common AI standard, there has to be collective thinking around this issue, to focus on spaces where there are gaps within existing frameworks”.

Evelyn Miller
Vice President of Data and Privacy Policy, Meta

“Today, we are already at a global scale, and Falcon is a flagship generative AI technology around the world. Today, the UAE is in the frontier of generative AI industries”.

Dr. Ebtessam Almazrouei
*Acting Chief AI Researcher,
Technology Innovation Institute*

“AI will create significant wealth for the population; it's the real path to abundance”.

Daniil Liberman
Co-Founder, Humanism

“Fear that AI is taking over in the creative sectors is not justified.”

Georg Wolfart
Head of Public Policy, Snap Inc.
